

IN THE CLAIMS

The text of all claims under examination is submitted, and the status of each is identified. This listing of claims replaces all prior versions, and listings, of claims in the application.

1. (currently amended) A method for the fungicidal treatment of hard surfaces and textile fiber material comprising contacting said hard surfaces and said textile fiber materials in a domestic washing process with a detergent composition comprising

(a) 0.01 to 90 % by weight of a compound of formula (1)

wherein

R₁ is hydrogen; or C₁-C₅alkyl

(b) 1 to 80 % by weight of one or more synthetic detergents or of a soap or combinations thereof;

(c) 0-75 % of a builder;

(d) 0-30% by weight of a peroxide;

(e) 0-10 % by weight of a bleach activator;

(f) 0 to 50 % by weight of one or more hydrotropic agents,

(g) 0 to 50 % by weight of an alcohol,

(h) 0 to 80 % by weight of a fabric softening component; and

(i) tap water or deionised water ad 100 %.

2. (previously presented) A method according to claim 1, wherein

R₁ is hydrogen.

3. (currently amended) A domestic detergent composition comprising

(a) 0.01 to 90 % by weight of a compound of formula (1)

wherein

R₁ is hydrogen; or C₁-C₅alkyl

~~according to claim 1;~~

- (b) 1 to 80 % by weight of one or more synthetic detergents or of a soap or combinations thereof;
- (c) 0-75 % of a builder;
- (d) 0-30% by weight of a peroxide;
- (e) 0-10 % by weight of a bleach activator;
- (f) 0 to 50 % by weight of one or more hydrotropic agents,
- (g) 0 to 50 % by weight of an alcohol,
- (h) 0 to 80 % by weight of a fabric softening component; and
- (i) tap water or deionised water ad 100 %.

4. (previously presented): A composition according to claim 3 comprising

- (a) 0.01 to 10 % by weight of a compound of formula (1);
- (b) 5 to 70 % by weight of one or more synthetic detergents or of a soap or combinations thereof and/or of a salt of a saturated and/or unsaturated C₈-C₂₂ fatty acid,
- (f) 0 to 50 % by weight of one or more hydrotropic agents,
- (g) 0 to 50 % by weight of an alcohol,
- (h) 0 to 80 % by weight of a fabric softening component; and
- (i) tap water or deionised water ad 100 %.

5. (previously presented): A composition according to claim 3, wherein a salt of lauric, myristic, palmitic, stearic, arachidic, behenic, caproic, dodecenoic, tetradecenoic, octadecenoic, oleic, eicosenoic or erucic acid is used as component (b).

6. (previously presented): A composition according to claim 3, comprising

- (a) 0.01-5% of a compound of formula (1);
- (b) 1-70% of an anionic surfactant and/or a nonionic surfactant;
- (c) 0-75% of a builder;
- (d) 0-30% of a peroxide; and
- (e) 0-10% of a bleach activator.

7. (original): A composition according to claim 6, comprising

- (a) 0.01-5% of a compound of formula (1);
- (b) 5-70% of an anionic surfactant and/or a nonionic surfactant;
- (c) 5-70% of a builder;

- (d) 0.5-30% of a peroxide; and
- (e) 0.5-10% of a bleach activator and/or 0.1-2% of a bleaching catalyst.

8. (previously presented): A composition according to claim 3 in which the detergent composition additionally comprises at least one enzyme selected from the group consisting of cellulase, protease, amylase and lipase.

9. (previously presented): A composition according to claim 3, wherein additionally
(k) an antimicrobial agent selected from 2-hydroxy-diphenyl ether of formula

- Y is chlorine or bromine,
- Z is SO₂H, NO₂ or C₁-C₄alkyl,
- r is from 0 to 3,
- o is from 0 to 3,
- p is 0, 1 or 2,
- m is 1 or 2, and
- n is 0 or 1.

is used.

10. (previously presented): A composition according to claim 9, wherein as component (k) 2-hydroxy-diphenyl ether of formula

i[[I]]s used.

11. (previously presented): A composition according to claim 9 comprising

- (a) 0.01 to 90 % by weight of a compound of formula (1);
- (b) 1 to 80 % by weight of one or more synthetic detergents or of a soap or combinations thereof;
- (f) 0 to 50 % by weight of one or more hydrotropic agents,

- (g) 0 to 50 % by weight of an alcohol,
- (k) 0 to 50 % by weight of an antimicrobial agent selected from 2-hydroxy-diphenyl ether of formula (2); and
- (i) tap water or deionised water ad 100 %.

12. (currently amended): A process for the domestic washing and fungicidal treatment of a textile fibre material wherein the textile fibre material is contacted with an aqueous solution of a detergent composition comprising ~~a compound of formula (1)~~ composition according to claim ~~1~~ 3.

13. (previously presented): A process according to claim 12, wherein the detergent composition contains at least one enzyme selected from the group consisting of cellulase, protease, amylase and lipase,
and wherein the temperature of the solution is between 5°C and 40°C throughout the process.

14. (previously presented): A process according to claim 12 in which the textile materials are polyamides, wool or cotton.

15. (previously presented): A process according to claim 12, wherein the composition is used in powder washing formulations, washing pastes, liquid washing formulations, fabric softeners or solid soaps.

16. (previously presented): A method for the fungicidal treatment of hard surfaces comprising contacting said hard surface with a composition according to claim 3.

17. (previously presented): A method according to claim 16, wherein the composition is used in dishwashing formulations.

18. (previously presented): A method according to claim 16, wherein the composition is used in all-purpose cleaners.

19. (cancelled)

20. (new): A method according to claim 1 wherein said textile fiber materials are treated in normal washing machines.
